1. Mesoblast licensee to launch stem cell treatment in Japan

2. Hemophilia A drug from Baxalta is commercialized in US

3. Researchers develop technique to improve osteogenic differentiation of stem cells

4. WHO offers guidelines to promote HIV treatment access, adherence

5. Phase I trial begins for cell therapy for blood cancers

6. Functional diaphragm tissue developed from stem cells

7. Ice-free cryopreservation used to store organs, cells, tissue

8. Startup to specialize in umbilical cord blood for transplants

9. FDA issues draft Ebola guidance for blood centers

10. Pluristem partners with Japanese researchers to develop cell therapy for radiation sickness

1. Call of duty: the effects of phone calls on blood donor motivation

2. Acid–base balance disturbances in plasma exchange depend on the replacement fluid used

3. Uric acid variation among regular blood donors is indicative of red blood cell susceptibility to storage lesion markers: A new hypothesis tested

4. Evaluation of small noncoding RNAs in ex vivo stored human mature red blood cells: changes in noncoding RNA levels correlate with storage lesion events

5. Interleukin-6 enhances the activity of in vivo long-term reconstituting hematopoietic stem cells in “hypoxic-like” expansion cultures ex vivo

6. Critical limb ischemia: thrombogenic evaluation of two autologous cell therapy products and biologic profile in treated patients

7. Long-term experiences in cryopreservation of mobilized peripheral blood stem cells using a closed-bag system: a technology with potential for broader application

8. Red blood cell storage duration is not associated with clinical outcomes for acute chest syndrome in children with sickle cell disease

9. Increased risk of volume overload with plasma compared with four-factor prothrombin complex concentrate for urgent vitamin K antagonist reversal

10. Age of blood and adverse outcomes in a maternity population
