1. Mortality higher for sickle cell anemia patients who discontinue transfusion as adults
2. Cyclophosphamide linked to lower rate of GVHD after blood cell transplants
3. Genital transplant performed in Boston
4. FDA releases revised draft guidelines on hepatitis C antiviral development
5. Fresenius launches CLiC monitoring device for hemodialysis
6. HHS leads observance of National Viral Hepatitis Testing Day
7. HIV DNA is removed from animal tissue in gene-editing study
8. Study finds lower rejection rate with concurrent liver-kidney transplant
9. Canada approves pathogen-reduction system for plasma
10. Study links statins to lower cirrhosis rates in HBV patients

1. Sustained and significant increase in reporting of transfusion reactions with the implementation of an electronic reporting system
2. Identification of novel variant A alleles within the ABO gene
3. Anti-Mur as the most likely cause of mild hemolytic disease of the newborn
4. Will pathogen reduction of blood components harm more people than it helps in developed countries?
5. Severe bleeding complications other than intracranial hemorrhage in neonatal alloimmune thrombocytopenia: a case series and review of the literature
6. Triplets with neonatal alloimmune thrombocytopenia due to antibodies against human platelet antigen 1a
7. Effect of storage time and donor sex of transfused red blood cells on 1-year survival in patients undergoing cardiac surgery: an observational study
8. Mitochondrial damage-associated molecular patterns as potential proinflammatory mediators in post-platelet transfusion adverse effects
9. Use of n-of-1 (single patient) trials to assess the effect of age of transfused blood on health-related quality of life in transfusion-dependent patients
10. Antibodies to human neutrophil antigen HNA-4b implicated in a case of neonatal alloimmune neutropenia
