1. FDA hearing to scrutinize marketing of stem cell therapies
2. Animal study could clear way for trial of sickle cell gene therapy
3. Immunotherapy linked to lymphoma remission in trial
4. Study assesses cord blood transplants for leukemia, MDS
5. Study: Intravenous iron effective for postoperative anemia
6. Zika virus detected in tears of infected mice
7. Transplant group’s new policies ensure living donors are prioritized
8. Functional liver tissue grown from adult stem cells
9. AABB analyzes FDA guidance on screening blood donors for ZIKV
10. Combinations of monoclonal antibodies efficiently suppress red blood cell alloimmunization in mice

1. New silent and weak D alleles: molecular characterization and associated antigen density
2. Peptide inhibitor of complement C1 modulates acute intravascular hemolysis of mismatched red blood cells in rats
3. Fetal RHD genotyping after bone marrow transplantation
4. Postnatal cytomegalovirus infection: a pilot comparative effectiveness study of transfusion safety using leukoreduced-only transfusion strategy
5. Cryoprecipitate indications and patterns of use in the pediatric intensive care unit: inappropriate transfusions and lack of standardization
6. Changes in blood center red blood cell distributions in the era of patient blood management: the trends for collection (TFC) study
7. Metabolites in stored platelets associated with platelet recoveries and survivals
8. Potential impact on blood availability and donor iron status of changes to donor hemoglobin cutoff and interd Donnation intervals
9. Effect of iron supplementation on iron stores and total body iron after whole blood donation
10. Impact of cord blood banking technologies on clinical outcome: a Eurocord/Cord Blood Committee (CTIWP), European Society for Blood and Marrow Transplantation and NetCord retrospective analysis
